DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a circuit for accurately delivering a first stimulus voltage to one or more circuit nodes of an IC, classified in class 324, subclass 765.
 - II. Claims 10-12, drawn to a method for accurately delivering a voltage to a circuit node, classified in class 324, subclass 158.1.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the group I can be used by another process, such as *by applying a first stimulus voltage to the circuit node via a second bus under control of a second periodic signal; and applying a second stimulus voltage to the circuit node under control of a third periodic signal which is inverted with respect to the second periodic signal so that the circuit node is driven alternately to the first stimulus voltage and to the second stimulus voltage.*
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2829

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
